

INDUSTRIAL SALT

Industrial Salt is an essential raw material used in a wide range of industrial sectors worldwide. Produced under strict quality control standards, our industrial salt offers consistent performance, reliable supply, and flexible specifications to meet the requirements of different industrial applications.

Whether used in chemical processing, water treatment, detergent production, textile manufacturing, leather processing, or other industrial operations, our products are supplied in accordance with customer specifications and market requirements.

Key Applications:

- Chemical Industry
- Water Treatment Plants
- Detergent & Cleaning Products Manufacturing
- Textile Industry
- Leather Processing & Tanning
- Oil & Gas Operations

Industrial Manufacturing Processes:

- Other Specialized Industrial Uses
- Product Advantages
- Consistent Quality
- Flexible Grain Sizes
- Reliable Supply Capacity

Export-Oriented Packaging Solutions:

- Customized Specifications Available
- Private Label Services Available
- Packaging Options
- PP Bags
- Jumbo Bags
- Palletized Cargo
- Bulk Shipments
- Customized Packaging Upon Request
- Private Label Solutions
- Customer Confidence & Transparency

We believe that long-term business relationships are built on transparency and trust. Therefore, we welcome our customers to visit our production facilities and packing operations to monitor production processes, packaging procedures, quality control practices, and loading operations.

Independent inspection and certification organizations nominated by the client, such as SGS, TÜV, or equivalent bodies, are also welcome to conduct inspections and verify compliance with agreed specifications.
